PROJECTS:
W3Schools (Frontend)

I built this project using HTML, CSS, Bootstrap, and JavaScript, for a modern and user-friendly web experience.

Trendy (Full-stack)

HTML, CSS, Bootstrap, JavaScript, Django, Python, MySQL I have developed a complete full stack website. My website provides a smooth experience on all devices, adjusting gracefully to different screen sizes for user-friendly navigation.

Test Portal (Full-stack)

HTML, CSS, Bootstrap, JavaScript, Django, Python, MySQL I have developed a complete full stack website. This is a test portal for students to attend exam. This page will run only if the user gives permissions for mic, camera, and speaker.

Helper Bot (Full-stack)

HTML, CSS, Bootstrap, JavaScript, Django, Python, MySQL This Project Accept the Query and give answer. Intuitive Hover Effects for user-friendly interaction. My website provides a smooth experience on all devices, adjusting gracefully to different screen sizes for user-friendly navigation.

PORTFOLIO

I deploy all my projects on a website and attach the project links to my portfolio page. LINK
